

Perceptions vs Reality: One Small Step or a Leap of Faith?

LUNCHEON

CBMC Metro South

Presents

Jeff Jones

Systems Integration & Test Engineer BAE Systems

**How do you approach life when problems happen?
Learn what Robotics Engineering has taught Jeff
about perception and surviving cancer**

Jeff Jones is a Bioengineer who has been involved in Systems Integration & Test for over 35 years. He has been part of Research & Development teams that produced: Artificial Hearts & Heart Devices, Autonomous (self-driving) Vehicles, and upgrades to the M109 Self Propelled Howitzer.

Jeff's experience in product validation, testing and troubleshooting has taken him down paths of questioning conventional wisdom. At the same time, he is aware of the fact that "no one knows it all," and there are many things that we all "believe" in that we cannot and will never understand.

In 2014 his doctors discovered he had brain cancer; the tumor has since been removed and after radiation and chemotherapy Jeff is now a cancer survivor.

Come to hear Jeff's message that conventional wisdom may require much more faith than previously thought. Conversely, things we may have previously considered unbelievable may not require a leap of faith: just one small step.

Jeff and his lovely wife Michele reside in Taneytown, Maryland and have 6 children and 3 grandchildren.

Christian Business Men's Connection

Come and bring a friend!

Date & Time: Tuesday, November 15, 2016
Networking 11:30 AM
